sustainability communication in lithuania

- problems of unsustainability are not clearly identified and named
- public awareness of the main sd principles and public participation is not sufficient
- sustainable development is not among priorities
- lack of education materials in lithuanian language
- lack of competent educators at all levels
- lack of media attention

ecat activities

- participation in preparation of the national program of education for sustainable development
- local public education and information campaigns, programmes
- conferences on esd topic (latest 14 –15 march 2007)
- publications (1998 –2004)
- projects on LA21 (1999 –2004)
- networking activities with local authorities

needs

- new learning approaches
- systematic change
- strategic networks and partnerships between government, community groups and citizens,
- incentives, local financial mechanisms
